DETAILED ACTION

Election/Restrictions

Applicant's election of Species IV, claims 75-81, in the reply filed on July 29, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claim 75 is not generic to claims 82-89, since claim 82 does not contain at least a reset transistor.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

The application has been amended as follows:

This application is in condition for allowance except for the presence of claims 45-74 and 82-89 to an invention non-elected without traverse. Accordingly, claims 45-74 and 82-89 have been cancelled.

REASONS for ALLOWANCE

The following is an examiner's statement of reasons for allowance:

The closest prior art, Zhao et al., discloses most of the limitations of the claims, but fails to show at least a plurality of trench photosensors formed in a doped layer of a first conductivity type of a substrate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Yu (illustrates a CCD with floating diffusion) and Lee et al. (illustrates a photo diode with floating diffusion and reset transistor).
